(The proper technical term for this is "citation"). It is a common practice among academics, journalists, and even students to use a pseudonym when referring to another person in a publication. Many academics prefer using a pseudonym over a full "middle initial" because it saves space, and because of the potential conflict between the middle initial and the first name. . . By 2017, popular video-sharing websites, such as YouTube, had hundreds of millions of videos posted by people. The Internet began as a research tool used by universities and government agencies, but its commercialization and its explosive growth made the Internet and the World Wide Web one of the fastest growing, most important, and useful inventions in the twentieth century. . . The period from 2005 to 2015 saw the development of online education and online libraries, including, the Open Access movement, and the development of social media websites.. . According to some sources, the word Web comes from a Norwegian linguist named Thorvald Graven. In 1994, Graven gave a lecture at

a Norwegian computer conference and described the concept of the World Wide Web. This was later published as an article in the Norwegian language newspaper, Bergen Tidende. The article stated that the name, World Wide Web, was adopted by a group of physicists, computer scientists, and engineers at CERN. . .
