In the art of making optical fiber cables, it has been found that in addition to the bare fiber itself, there is also need for a low-backreflection (high-transmission) sleeve or connector for the ends of the optical fiber cables that are to be joined together. Because of the extremely fragile nature of optical fiber cables, it is of the utmost importance that the fiber-cable endpieces be precisely positioned so that the ends of the fibers are received in the cladding of the fiber and the fiber jacket is held in close contact with the jacket of the optical fiber cable.The internal normal limits for TSH, FT4 and FT3 levels in a cohort of pregnant women of the mainland of Poland.
