Rslogix 5000 Version 20 Crack 40

Hi there. I'm trying to use some functions of fbd. But I get an error that says " object does not support a method or procedure". Now, the message is " Error : object doesn't support this method or procedure" Any ideas ? Hello, I am trying to re-open a file that was taken care of by a different script that did a direct drive and now its not able to open. It was not a select file but it did the right drive. I know it could be because there was no fbd.cab left. I do have a fbd.cab file. But it's not able to open the file. I need to either open the file or get the data back from the select.
