
George Harrison [HD], 73, died on November 29, 2001, of liver cancer. I have been to nearly all of the festivals since 1976, the first time I set foot in India. An Indian fan club sent me an invitation. Read reviews, compare customer ratings, see screenshots, and learn more about. Concert for George. Andrew July 24, George Michael and a very rare HDTV. The Concert for George on Warner Brothers DVD and a DVD player.

Q: Getting error "Warning: mysqli_fetch_assoc() expects parameter 1 to be mysqli_result" I have a problem with mysqli_fetch_assoc. I am getting the following error: Warning: mysqli_fetch_assoc() expects parameter 1 to be mysqli_result, null given in /home/sites/0/avali.com/public_html/index.php on line 19 I have included the following files: include("dbConnect.php"); include("pageheader.php"); include("navigation.php"); \$hostname = "localhost"; \$username = "root"; \$password = ""; \$database = "sites"; // Create connection \$conn = mysqli_connect(\$hostname, \$username, \$password); if (!\$conn) { echo "Failed to connect to MySQL: ". mysqli_connect_error(); } The query in question: \$result = mysqli_query(\$conn, "SELECT * FROM page WHERE page_name='\$page_name'"); while(\$row = mysqli_fetch_assoc(\$result)) { \$pageid = \$row['page_id']; } I cannot find where this error is coming from. Can anyone help me? A: You should add \$conn as the first parameter of mysqli_fetch_assoc. mysqli_query(\$conn, "SELECT * FROM page WHERE page_name='\$page_name'"); while(\$row = mysqli_fetch_assoc(\$result)) { \$pageid = \$row['page_id']; } In recent years, due to advances in technology, electronic devices have become increasingly
