A visit to San Francisco this week got me thinking about the article from last week. I shared an excerpt from that article at the end of this one and said I'd share more details next week. But this weekend has been a disaster of a weekend. So, I'm going to share some details now. I'm glad that I didn't cancel my trip to SF. I didn't think it was worth the hassle of cancelling. Plus, it would have cost me a lot of money to do so. I'm glad that I went instead. Here's what I learned from it: Don't travel on Friday evening. My flight was scheduled to leave Portland at 7 PM on Friday. I figured that the weather was going to be good and I wouldn't be affected by the possibility of snow. However, I was wrong. After arriving at the airport, my flight was delayed by an hour. It was delayed for around two hours. Then, as we approached the runway, we were told that the runway was closed. I was in a bit of a panic. There was no way I was going to be able to get back to the hotel in time to take the 9 PM flight. I asked the flight attendant what to do and she told me that I had to stay on the plane 2d92ce491b
