It's that time of year again! The third in the new Star Wars film trilogy, Star Wars: The Last Jedi, is finally in cinemas. As in the past, we can expect all sorts of interpretations to crop up over the next few months, some of which may turn out to be amusing, others perhaps less so. From the moment The Last Jedi was announced, it became the most scrutinised film in the franchise, with many fans expecting a bit of a shift in tone. And while many of the rumours flying around before the film premiered have proved to be correct, there are still some interesting tidbits of information surrounding this latest instalment that you might have missed. One of the big stories is, of course, the inclusion of female characters in major roles. Not only has Daisy Ridley's Rey become a primary protagonist, but so has Oscar-winner Kelly Marie Tran as general Resistance mechanic and gunner, Finn. We saw the back and forth between Fisher and Tran when questions were asked about their involvement after those realisations, and the writers reportedly said that they were both "in the movie". Which seems to imply

that the two actors are not just literally in the film, but are in major roles. That's not the only shift in tone, however. The Force Awakens saw its villains – the First Order – being portrayed as more complex and understandable than previous iterations, but The Last Jedi appears to be trying something different. As well as focusing on the antagonists, it turns the other main characters in a different direction, making them more understandable and sympathetic, even if they don't have quite as much screen-time as the main protagonist. And after all the excitement, what have the original trilogy cast told us about the movie? While they were all brought in to record a series of "leaks" which were actually fairytales, Peter Mayhew revealed a story about the return of a Jedi legend. Mayhew used to play Chewbacca's enormous bear friend Chewbacca in the first two films, and has since maintained a close friendship with Johnson. He even went as far as to say that The Last Jedi will be introducing the iconic creature into the film. This certainly lines up with the images of the film which were released in advance, featuring a strange creature in the background. Another character who first appeared in The Last Jedi

is Flix, the droid who tells Rey about the
