Download Drop Menu II Applet From here. A: Do a Google search for Applet Widgets. This article (page 2) has a variety of excellent choices. Q: Show HTML formatted comments in Doxygen In Doxygen it is possible to show comments in HTML format by using the HTML_COMMENTS directive. Is it possible to also specify the markup to be used for other HTML styled elements such as and ? The documentation mentions that the default formatting for comments is HTML, but not which formatting is used for the other HTML elements. A: There is not much more documentation available on that directive, but if you are familiar with and you can easily adapt the one used for HTML comments to apply to other HTML elements, like this: HTML_COMMENTS = YES HTML_IMPORT_EXTENSION =.html HTML_HEADER_EXTRA_STYLES = HTML_FOOTER_EXTRA_STYLES = HTML_EXTRA_STYLES = HTML_COLORSTYLE_HUE = 220 HTML_COLORSTYLE_SAT = 75 HTML_COLORSTYLE_GAMMA = 80 HTML_TIMESTAMP = NO HTML_EXTRA_STYLES_IN_HEADER = YES HTML_EXTRA_STYLES_IN_FOOTER = NO HTML_EXTRA_STYLES_AS_FRAMESET = NO After that you will have and styled by Doxygen as you would expect, but with HTML formatting. EDIT You can specify the colorscheme, font and background in Doxygen configuration by adding this line to doxygen.cfg, as described in this answer. Then you should be able to use HTML_COLORSTYLE_HUE or HTML_COLORSTYLE_SAT to set a light or dark color scheme, for example: HTML_COLORSTY

System Requirements:

For Steam: -Windows XP SP3 or newer -Intel Pentium 4 or AMD Athlon 64 processor -2 GB RAM -50 GB hard drive -1 GB video card with 64 MB VRAM and shader support -ATI Radeon X1600 or nVidia GTS 250 -Input Device: Gamepad or Keyboard and Mouse For Origin:
