===== * Help you do more with your Mac in a few simple steps. * Full Keyboard control: You'll get complete keyboard access with this program. The keyboard shortcuts are listed in the program's Preferences dialog. * Duplicate a Window: With one click you can duplicate a window, making it appear on two, three, four, and more monitors. You can then control and move those windows the way you want. * Grab a Window: You can also grab a window, either one of your own, or any other window on the system. It will remain in place until you release it, or until you log out. * Clipboard Manager: This program includes a clipboard manager that helps you organize and manage the clips you copy and paste. You can move them to any folder, email them, send them by Instant Messenger, import them into other applications, or just delete them. * Other Features: * A true finder with QuickFind: When you search the Mac or its file system, Picget finds what you're

looking for. * History Assistant: To help you avoid multiple entries of the same command, Picget remembers recent commands for the same purpose. * Window and Folder Shrinking: By default, everything you do in Picget is done with a title bar and window. But it isn't necessary. You can shrink every window and folder in a display to exactly one row of icons or even to nothing if you like. * Automatically login to a BBS: Simply tell Picget which BBS or bulletin board you want to log into, and which screen name you'd like to use. * Sort files alphabetically or numerically: You can sort your files by name, type, size, date modified, or other criteria. * Internet Browser: Picget comes with a built-in Internet browser that's just as powerful as Safari and Firefox. * Built-in web browser: Also included is a built-in web browser that displays Internet web pages in a window. * Built-in mail client: With a single click, you can send a message to any email address in any format. * Easy to use: Simply click the icon on the toolbar and follow the steps to use Picget. Compatibility: ===== * OS X 10.5.8 or later * 10.6 (Snow Leopard) or later * 10.6.4 or later * 10.7 (Lion) 77a5ca646e
