Thanks, this is excellent for the basic things we want. What I would really like is the ability to work with HPC clusters. We have petascale clusters and develop software that can take several days to run even on a desktop PC. If you could tell me if Spyder has HPC support that would be great. Also, how much performance you have seen to run those files on a cheap machine. Re: Spyder Originally Posted by Ldiid Thanks, this is excellent for the basic things we want. Re: Spyder Hi Ldiid, I work with Spyder, parallel programming and CUDA and I think that Spyder supports MPI for CUDA. But you can use other mechanisms (zero-copy, mechanisms of other interfaces as IPC, message-passing synchronisation); I don't know with which mechanism Spyder works as configuration is not directly in the programs (properties of execution environment).
