What's New in the AutoCAD?

Better text handling in the drawing area and on the command line. (video: 1:06 min.) View the drawing grid when working with Drafts. (video: 0:56 min.) Quick insertion of shapes into your design. Quick insertion of shapes into your design. (video: 0:45 min.) See and use multiple annotation sets for your design. (video: 1:03 min.) Text Styles: Match words, names, and values automatically. Text styles allow you to align text (e.g., align words in a paragraph, columns in a table, or titles on a page) and match styles across drawings. (video: 1:30 min.) Text reference editing: Make text editable, align text, and change text direction automatically. Text reference editing enables you to edit a text object in another drawing with ease. (video: 2:03 min.) Copy text to a new layer, apply a different font or color, or even display text in another format. Copy text to a new layer, apply a different font or color, or even display text in another format. (video: 1:53 min.) Outline and title blocks: Create and edit multiple outline and title blocks. Outline and title blocks provide a visual reference to different drawing units and sections of your drawings. (video: 1:19 min.) ArcObjects/Map Objects: Display data labels directly on your map. Data labels appear when you use a Label object and point to a specific location on a map, when you draw a polyline on a map, or when you create and edit labels on a drawing map. (video: 1:15 min.) Save time by creating your own labels and symbols using a library of over 200 predefined objects, or by creating and editing your own symbols.
