Rambo III Tortured, defeated, and nearly mad with rage, Richard "Rambo" Shaw (Dolph Lundgren) is a former U.S. Army special forces soldier. After nearly losing his legs and everything else in the jungle, he is forced to fight Colonel Trautman (Thomas Jane), a sadistic war profiteer who has turned Vietnam into a toxic hell. After Trautman betrays him by tricking and killing one of his men, Rambo is confined in a mental asylum where a few of his kind have been stationed for unknown reasons. There he begins a brutal campaign to avenge his lost friends and his former army comrades. Movie Review Okay, so Rambo II is the only Rambo film you need to see -- the original movie comes out this week. While some may see the sequel as a waste of time, I actually quite enjoy seeing the story of Rambo II continue with a fresh set of eyes. The story starts off right where the original left off. When the story opened, Rambo was in his own personal hell where he's being held captive by the U.S. military and tortured. I have to say, by the end of this film, Rambo had become one of my favorite action heroes -- I admired the man for his ability to survive and push himself to continue. (He was one of the few action heroes to survive because he's a reject.) In this film, we continue to see how his mind is being tested when he's put back to work and mixed with a bunch of war profiteers who're just out for a good time and "good" doesn't even necessarily mean "clean water." The main character is thrown into a sanitarium where he becomes friends with another inmate. On the outside, Rambo gets training and a new job. As the movie continues, we learn more about the relationship between Rambo and his new friend and fellow prisoner named Yates (Steven Seagal). Yates is a dangerous vigilante who is on the fringe of right wing extremist movements and a full-on fanatic. During this time, Rambo returns to his hometown of East Germany and begins attending the funeral of one of his high school friends, Jeb (Graham Jarvis). But he's not there to pay his respects for the man who actually trained him for the Army. No, he's there because of something he saw in Jeb's coffin. Although the two of them differ greatly, Rambo

Liver transplantation in Wilson's disease: prospective analysis of clinical and biochemical features of the disease. To characterize the behavior of Wilson's disease during the course of orthotopic liver transplantation. Eleven consecutive patients (7 male, 4 female; median age, 27 years; range, 12 to 56 years) with biochemically proven Wilson's disease and cirrhosis who underwent liver transplantation between 1995 and 1999 were prospectively analyzed. Thirteen of the 16 transplanted patients had a previous diagnosis of Wilson's disease, and 1 was transplanted for primary biliary cirrhosis. Three patients had undergone previous liver transplantation. The median time interval from the first medical consultation to liver transplantation was 5.5 months (range, 3 to 30 months). Seven of the 11 patients suffered from hepatolenticular degeneration, and 2 had previously uncharacterized liver disease. All patients survived the liver transplantation, with a median survival time of 89.5 months (range, 46 to 111 months). During the follow-up period of 46 months, 3 patients died; 2 for primary graft nonfunction, and 1 for cancer. Currently, 4 patients have hepatocellular carcinoma, and 3 have hepatic decompensation. Serum copper level after transplantation was significantly lower than that before transplantation, and 2 patients had a significant reduction in the hepatic copper content. Of the 11 patients with a follow-up period of more than 1 year, 10 were well and 1 developed

hepatic decompensation in the form of a hepatic abscess. Advanced Wilson's disease is a well-tolerated condition that is manageable with orthotopic liver transplantation.
